Subject Index

Acetophenone
Catalytic hydrogenation on Raney nickel catalyst modified by chromium hydroxide deposition 91
Acidity
Selective alkylation of phenol to 2,6-xylenol over vanadia–chromia mixed oxide catalysts 165
Acylation
Design of synthetic zeolites as catalysts in organic reactions: Acylation of anisole by acyl chlorides or carboxylic acids over acid zeolites 109
Adsorption
Design of synthetic zeolites as catalysts in organic reactions: Acylation of anisole by acyl chlorides or carboxylic acids over acid zeolites 109
Adsorption
Studies of molybdena–alumina catalysts. XV. Effect of fluorine-modified alumina on catalyst properties 247
Adsorption
Kinetic study of the low-temperature water–gas shift reaction over a Cu–ZnO catalyst 285
Ageing
Influence of cerium on the catalytic properties of ZSM-20 zeolite in the cracking of n-heptane: Comparison with rare earth Y zeolites 175
Alcohol synthesis
Alcohol synthesis from syngas on group VIII metal catalysts promoted by Mo–Na_2O 213
Alkylation
Effects of pH during preparation on the physico-chemical, acidity and catalytic properties and coking tendencies of HZSM-5-type catalysts 27
Alkylation
Selective alkylation of alkylbenzenes in the presence of HZSM-5 zeolites 101
Alkylation
Selective alkylation of phenol to 2,6-xylenol over vanadia–chromia mixed oxide catalysts 165
Alkylbenzenes
Selective alkylation of alkylbenzenes in the presence of HZSM-5 zeolites 101
Ammonia synthesis
Adsorption of group VIII metal cyanide complexes on acid-modified γ-alumina. Preparation of new supported metallic catalysts 225
Ammoxidation
Ammoxidation of picolines on vanadium phosphate catalysts 205
Anisole
Design of synthetic zeolites as catalysts in organic reactions: Acylation of anisole by acyl chlorides or carboxylic acids over acid zeolites 109
Aromatic hydrocarbon conversion
Shape selectivity of zeolite EU-1 in reactions of aromatic hydrocarbons 307

Benzene oxidation
Complete catalytic oxidation of benzene over supported vanadium oxides modified by paladium 125
Brønsted acid
Shape selectivity of zeolite EU-1 in reactions of aromatic hydrocarbons 307
Butene oxidation
Selectivities and intermediates in the oxidation of butene on vanadium oxides on titania 273

Carbon filaments
Novel type of carbon-supported catalysts. II. Activity measurements 319
Carbon monoxide hydrogenation
Effects of the addition of zeolites on ruthenium catalysts in carbon monoxide hydrogenation 45
Carbon monoxide oxidation
Modelling catalyst–support interactions in carbon monoxide oxidation catalysed by Pd/SnO_2 55
Carbon monoxide oxidation
Solid electrolyte potentiometry at an oxide electrode L1
Carbon monoxide oxidation
Novel type of carbon-supported catalysts. II. Activity measurements 319
Catalyst characterization (nitrogen adsorption)

Studies of molybdena–alumina catalysts. XV. Effect of fluorine-modified alumina on catalyst properties 247

Catalyst characterization (potentiometry)
Solid electrolyte potentiometry at an oxide electrode L1

Catalyst characterization (temperature-programmed techniques)
Effects of pH during preparation on the physico-chemical, acidity and catalytic properties and coking tendencies of HZSM-5-type catalysts 27

Catalyst characterization (transient response)
Kinetic study of the low-temperature water–gas shift reaction over a Cu–ZnO catalyst 285

Catalyst characterization (XRD, ESR, DRS)
Complete catalytic oxidation of benzene over supported vanadium oxides modified by palladium 125

Catalyst characterization (XRD, SEM)
HZSM-5 pelletized and modified with α-$Ca_3(PO_4)_2$ and HPO_4^{2-} as a catalyst for methanol conversion 143

Catalyst preparation (acid modification)
Adsorption of group VIII metal cyanide complexes on acid-modified γ-alumina. Preparation of new supported metallic catalysts 255

Catalyst preparation (extrusion)
HZSM-5 pelletized and modified with α-$Ca_3(PO_4)_2$ and HPO_4^{2-} as a catalyst for methanol conversion 143

Catalyst preparation (gas-phase, impregnation)
Selectivities and intermediates in the oxidation of butene on vanadium oxides on titania 273

Catalyst preparation (incipient wetness)
Effects of the addition of zeolites on ruthenium catalysts in carbon monoxide hydrogenation 45

Catalyst preparation (wet impregnation)
Modelling catalyst-support interactions in carbon monoxide oxidation catalysed by Pd/SnO_2 55

Catalyst preparation (wet impregnation)
Alcohol synthesis from syngas on group VIII metal catalysts promoted by Mo–Na_2O 213

Catalyst–support interactions
Modelling catalyst–support interactions in carbon monoxide oxidation catalysed by Pd/SnO_2 55

Cerium
Influence of cerium on the catalytic properties of ZSM-20 zeolite in the cracking of n-heptane: Comparison with rare earth Y zeolites 175

Chloride
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. II: Influence of various compounds containing phosphorus, oxygen, sulphur and chloride on the catalytic performance of platinum catalyst 235

Chromium hydroxide
Catalytic hydrogenation on Raney nickel catalyst modified by chromium hydroxide deposition 91

Cobalt–molybdenum/alumina
Novel type of carbon-supported catalysts. II. Activity measurements 319

Cobalt/alumina
Adsorption of group VIII metal cyanide complexes on acid-modified γ-alumina. Preparation of new supported metallic catalysts 255

Cobalt/alumina
Novel type of carbon-supported catalysts. II. Activity measurements 319

Coke formation
Effects of pH during preparation on the physico-chemical, acidity and catalytic properties and coking tendencies of HZSM-5-type catalysts 27

Coke formation
Effect of steam on the coking of platinum catalysts. I. Inhibiting effect of steam at low partial pressure for the dehydrogenation of cyclopentane and the coking reaction 67

Coke formation
Effect of steam on the coking of platinum catalysts. II. Kinetics 75

Coke formation
HZSM-5 pelletized and modified with α-$Ca_3(PO_4)_2$ and HPO^{2-} as a catalyst for methanol conversion 143

Coke formation
Influence of cerium on the catalytic properties of ZSM-20 zeolite in the cracking of

n-heptane: Comparison with rare earth Y zeolites 175
Coke formation
Novel type of carbon-supported catalysts. II. Activity measurements 319
Copper oxide
Solid electrolyte potentiometry at an oxide electrode L1
Copper-zinc oxide/alumina
Effect of carbon dioxide on methanol synthesis over different catalysts 83
Copper-zinc oxide/alumina
Kinetic study of the low-temperature water-gas shift reaction over a Cu-ZnO catalyst 285
Cyclopentadiene formation
Effect of steam on the coking of platinum catalysts. I. Inhibiting effect of steam at low partial pressure for the dehydrogenation of cyclopentane and the coking reaction 67
Cyclopentane dehydrogenation
Effect of steam on the coking of platinum catalysts. I. Inhibiting effect of steam at low partial pressure for the dehydrogenation of cyclopentane and the coking reaction 67

Dehydrogenation
Catalysis with permselective inorganic membranes — a review 1

Fischer-Tropsch synthesis
Alcohol synthesis from syngas on group VIII metal catalysts promoted by Mo-Na_2O 213

Glucose
Catalytic hydrogenation on Raney nickel catalyst modified by chromium hydroxide deposition 91
Group VIII metal cyanide
Adsorption of group VIII metal cyanide complexes on acid-modified γ-alumina. Preparation of new supported metallic catalysts 255
Group VIII metals
Alcohol synthesis from syngas on group VIII metal catalysts promoted by Mo-Na_2O 213

Heptane cracking
Influence of cerium on the catalytic properties of ZSM-20 zeolite in the cracking of n-heptane: Comparison with rare earth Y zeolites 175
Hydrodesulphurization
Studies of molybdena-alumina catalysts. XV. Effect of fluorine-modified alumina on catalyst properties 247
Hydrodesulphurization
Novel type of carbon-supported catalysts. II. Activity measurements 319
Hydrogenation
Catalysis with permselective inorganic membranes — a review 1
Hydrogenation
Catalytic hydrogenation on Raney nickel catalyst modified by chromium hydroxide deposition 91
Hydrogenation
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. I: Influence of nitrogen-containing compounds 219
Hydrogenation
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts II: Influence of various compounds containing phosphorus, oxygen, sulphur and chloride on the catalytic performance of platinum catalyst 235
HZSM-5
Selective alkylation of alkylbenzenes in the presence of HZSM-5 zeolites 101
HZSM-5
HZSM-5 pelletized and modified with α-$Ca_3(PO_4)_2$ and HPO_4^{2-} as a catalyst for methanol conversion 143

Inorganic membranes
Catalysis with permselective inorganic membranes — a review 1
Iron/alumina
Adsorption of group VIII metal cyanide complexes on acid-modified γ-alumina. Preparation of new supported metallic catalysts 255

Kinetics
Modelling catalyst-support interactions in

carbon monoxide oxidation catalysed by Pd/SnO_2 55
Kinetics
Effect of steam on the coking of platinum catalysts. II. Kinetics 75
Kinetics
Design of synthetic zeolites as catalysts in organic reactions: Acylation of anisole by acyl chlorides or carboxylic acids over acid zeolites 109
Kinetics
Kinetic study of the low-temperature water-gas shift reaction over a Cu-ZnO catalyst 285

Membranes
Catalysis with permselective inorganic membranes — a review 1
Methanol conversion
HZSM-5 pelletized and modified with α-$Ca_3(PO_4)_2$ and HPO_4^{2-} as a catalyst for methanol conversion 143
Methanol synthesis
Effect of carbon dioxide on methanol synthesis over different catalysts 83
Molybdena-alumina
Studies of molybdena-alumina catalysts. XV. Effect of fluorine-modified alumina on catalyst properties 247

Nickel/alumina
Adsorption of group VIII metal cyanide complexes on acid-modified γ-alumina. Preparation of new supported metallic catalysts 255
Nitric oxide reduction
Novel type of carbon-supported catalysts. II. Activity measurements 319
Nitrogen-containing compounds
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. I: Influence of nitrogen-containing compounds 219
Noble metal catalysts
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195

Oxidation
Catalysis with permselective inorganic membranes — a review 1
Oxide electrode
Solid electrolyte potentiometry at an oxide electrode L1
Oxygen
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. II: Influence of various compounds containing phosphorus, oxygen, sulphur and chloride on the catalytic performance of platinum catalyst 235

Palladium
Catalysis with permselective inorganic membranes — a review 1
Palladium
Complete catalytic oxidation of benzene over supported vanadium oxides modified by palladium 125
Palladium
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195
Palladium/alumina
Effect of carbon dioxide on methanol synthesis over different catalysts 83
Palladium/stannia
Modelling catalyst-support interactions in carbon monoxide oxidation catalysed by Pd/SnO_2 55
Periodic effects
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195
Phenol
Selective alkylation of phenol to 2,6-xylenol over vanadia-chromia mixed oxide catalysts 165
Phosphorus
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. II: Influence of various compounds containing phosphorus, oxygen, sulphur and chloride on the catalytic performance of platinum catalyst 235
Picoline ammoxidation
Ammoxidation of picolines on vanadium phosphate catalysts 205
Piperidine
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on

platinum and rhodium catalysts. I: Influence of nitrogen-containing compounds 219
Platinum
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195
Platinum
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. I: Influence of nitrogen-containing compounds 219
Platinum
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. II: Influence of various compounds containing phosphorus, oxygen, sulphur and chloride on the catalytic performance of platinum catalyst 235
Platinum/alumina
Effect of steam on the coking of platinum catalysts. I. Inhibiting effect of steam at low partial pressure for the dehydrogenation of cyclopentane and the coking reaction 67
Platinum/alumina
Effect of steam on the coking of platinum catalysts. II. Kinetics 75
Propane oxidation
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195
Propene oxidation
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195

Raney nickel
Catalytic hydrogenation on Raney nickel catalyst modified by chromium hydroxide deposition 91
Rhodium
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195
Rhodium
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. I: Influence of nitrogen-containing compounds 219
Rhodium
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. II: Influence of various compounds containing phosphorus, oxygen, sulphur and chloride on the catalytic performance of platinum catalyst 235
Ruthenium/titania
Effects of the addition of zeolites on ruthenium catalysts in carbon monoxide hydrogenation 45

Selectivity (alcohols)
Alcohol synthesis from syngas on group VIII metal catalysts promoted ny Mo-Na_2O 213
Selectivity (C_2–C_4 alkenes)
Effects of the addition of zeolites on ruthenium catalysts in carbon monoxide hydrogenation 45
Selectivity (carbonyl group)
Catalytic hydrogenation on Raney nickel catalyst modified by chromium hydroxide deposition 91
Selectivity (cresol, xylenol)
Selective alkylation of phenol to 2,6-xylenol over vanadia–chromia mixed oxide catalysts 165
Selectivity (furan)
Selectivities and intermediates in the oxidation of butene on vanadium oxides on titania 273
Selectivity (hydrocarbons)
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. I: Influence of nitrogen-containing compounds 219
Selectivity (other)
Catalysis with permselective inorganic membranes — a review 1
Selectivity (nitriles)
Ammoxidation of picolines on vanadium phosphate catalysts 205
Selectivity (*para*-aromatics)
Effects of pH during preparation on the physico-chemical, acidity and catalytic properties and coking tendencies of HZSM-5-type catalysts 27

Selectivity (*para*-aryl ketones)
Design of synthetic zeolites as catalysts in organic reactions: Acylation of anisole by acyl chlorides or carboxylic acids over acid zeolites 109
Selectivity (*para*-dialkylbenzene)
Selective alkylation of alkylbenzenes in the presence of HZSM-5 zeolites 101
Selectivity (shape-)
Shape selectivity of zeolite EU-1 in reactions of aromatic hydrocarbons 307
Selectivity (xylenes)
Shape selectivity of zeolite EU-1 in reactions of aromatic hydrocarbons 307
Solid electrolyte potentiometry
Solid electrolyte potentiometry at an oxide electrode L1
Steam
Effect of steam on the coking of platinum catalysts. I. Inhibiting effect of steam at low partial pressure for the dehydrogenation of cyclopentane and the coking reaction 67
Steam
Effect of steam on the coking of platinum catalysts. II. Kinetics 75
Sulphur
Additive effects in the selective hydrogenation of unsaturated hydrocarbons on platinum and rhodium catalysts. II: Influence of various compounds containing phosphorus, oxygen, sulphur and chloride on the catalytic performance of platinum catalyst 235
Syngas conversion
Effect of carbon dioxide on methanol synthesis over different catalysts 83
Syngas conversion
Alcohol synthesis from syngas on group VIII metal catalysts promoted by Mo-Na_2O 213

Three-way automotive catalysts
Periodic operation effects in propane and propylene oxidation over noble metal catalysts 195

Vanadia-chromia
Selective alkylation of phenol to 2,6-xylenol over vanadia-chromia mixed oxide catalysts 165
Vanadium oxide/titania
Selectivities and intermediates in the oxidation of butene on vanadium oxides on titania 273
Vanadium oxides
Complete catalytic oxidation of benzene over supported vanadium oxides modified by palladium 125
Vanadium phosphate
Ammoxidation of picolines on vanadium phosphate catalysts 205

Water-gas shift reaction
Kinetic study of the low-temperature water-gas shift reaction over a Cu-ZnO catalyst 285

Zeolites
Effects of pH during preparation on the physico-chemical, acidity and catalytic properties and coking tendencies of HZSM-5-type catalysts 27
Zeolites
Effects of the addition of zeolites on ruthenium catalysts in carbon monoxide hydrogenation 45
Zeolites
Selective alkylation of alkylbenzenes in the presence of HZSM-5 zeolites 101
Zeolites
Design of synthetic zeolites as catalysts in organic reactions: Acylation of anisole by acyl chlorides or carboxylic acids over acid zeolites 109
Zeolites
HZSM-5 pelletized and modified with α-$Ca_3(PO_4)_2$ and HPO_4^{2-} as a catalyst for methanol conversion 143
Zeolites
Influence of cerium on the catalytic properties of ZSM-20 zeolite in the cracking of n-heptane: Comparison with rare earth Y zeolites 175
Zeolites
Shape selectivity of zeolite EU-1 in reactions of aromatic hydrocarbons 307
Zinc oxide/chromia
Effect of carbon dioxide on methanol synthesis over different catalysts 83
ZSM-20
Influence of cerium on the catalytic properties of ZSM-20 zeolite in the cracking of n-heptane: Comparison with rare earth Y zeolites 175
